Terms of Sale and Expedition.

The prices of the present catalogue are quoted in belgian currency ;
1,— Franc = 10 Pence = 20 Cents.

Addresses : I beg my customers to mention on each order their address as exact as possible.

Credit : A credit of three months is accorded to the known firms, if no special terms have been admitted. New customers are invited to procure sufficient references or to allow cash-payment. The amounts of my invoices are received by draft.

Cash : A discount of 3% is allowed for cash-payment.

Packing and expedition : All expenses of package and expedition are on charge of the purchaser and are quoted at cost-price. The packing of the plants is executed by good experienced packers and under my own controle. I beg for the mode of expedition on each order ; when no instructions are given I send by the way that seems me the most convenient, but without any responsibility.

Injuries : The goods travel on the risk of the purchaser, and I take no responsibility for the injuries made between the voyage.

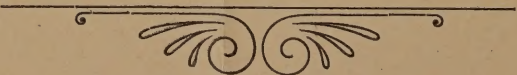

If plants are no more disposable at the ordered prices, I take the liberty to give them in the adjacent price.

No claims are taken in consideration if not made immediately on the receipt of the goods.

INVITATION.

Foreign gardeners and nurserymen, making the voyage to Belgium, are invited to honour me with a visit, because it will give them the conviction that I have all my offered articles of own culture and in large quantities.

My nurseries are situated just near the railway-station of Ledeberg, and only 5 minutes from the electric-station Ghent-Ledeberg.

Azalea indica.

As usually every year, my collections of Azalea indica have been improved with the best novelties. The varieties mentionned in the lists are disposable in all quantities from the end of August untill the following spring, in fine, well budded plants.

William Downing. Amaranth red.
 * Concessum. Pure white.
 * Mont blanc. Nice white flower with pink shade.
 * Cunninghamis White. White with yellow shade.
 * Catawbiense Grandiflore. Violet-purple.

N. B. During the winter and the spring I dispose of a large stock of half-budded Rhododendrons, specially used for park- and garden planting, at reduced prices.

Araucaria excelsa.

Araucaria excelsa.

A predominant question in the culture of Araucarias belongs to the choice of the sort. The height of the plant is less important than the good type, because the buyer will always prefer a broad and well shaped plant.

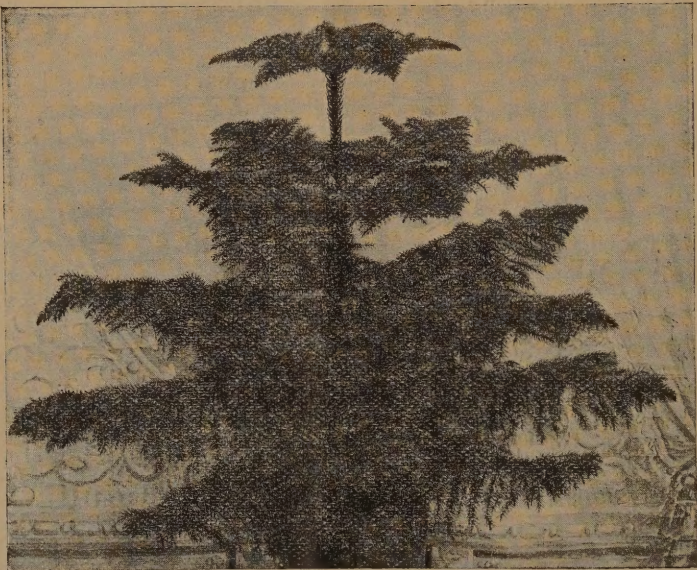

Since many years I grow only the old broad variety, and I have the conviction that it satisfies the best to the wishes of all my customers ; it makes short plants with thick leaves and broad regular crowns.

All my Araucarias are cultivated from head-cuttings. I only use the seedlings and leaves-cuttings for grafting other varieties, and I furnish them only when specially ordered, as they have no value for the sale.

Araucaria excelsa, young plants	at Francs :	1.— — 1.25 and 1.50
" " middle size	" "	2.— — 2.50 and 3.—
" " strong plants	" "	4.— — 5.— and 6.—
Very strong specimen	from "	8.— to 30.—

Araucaria excelsa glauca.

Araucaria excelsa glauca.

This variety makes shorter and broader plants than the preceding one, the crowns are thick and compact and bluish green coloured.

Young plants, with 2 to 3 crowns	at Francs: 2.50 — 3.— and 3.50
Strong, well shaped plants	" " 4.— — 5.— and 6.—
Very strong plants for exhibition	from " 8.— to 35.—

<u>Araucaria excelsa compacta</u>	from Francs: 4.— to 12.—
" " <u>robusta</u>	" " 3.— " 8.—
" <u>Bidwilli</u>	" " 5.— " 20.—
" <u>Cunninghami</u>	" " 6.— " 20.—

" <u>Jos. Nap. Baumann</u>	" " 10.— " 45.—
" <u>im bricata</u>	" " 5.— " 40.—
" <u>Roi Léopold</u>	" " 6.— " 20.—

N. B. — A collection of 6 varieties of Araucarias of my own choice. 25.— " 60.—

Palms.

The culture of the Palms has always been one of my greatest specialities. During all the year I dispose of a large stock of fine stuff, principally in the good commercial sorts, and at very reduced prices.

Seedlings of Palms in stores or in small pots; prices pro 100 and pro 1000 will be sent on demand.

General Palm-Collection.

<u>Acantophœnix crinata</u>	Fr. 10.— — 35.—
<u>Areca alba</u>	" 3.— — 12.—

Areca Baueri.

Areca Baueri is one of the most graceful Palms; its darkgreen foliage resembles very well to that of *Kentia forsteriana*; the stem and the ribs of the leaves are brown; its culture is very easy and suits well for apartments.

Fine market plants from	Fr. 0.80 to 4.50
Stronger specimen from.	" 6.— " 16.—

Areca lutescens.

Areca lutescens is a very light variety that takes nearly the middle place between *Kentia* and *Cocos weddelliana*; of own nature it is allways growing in „touffes“ (bushes) and it may be recommended for all kinds of fine and light garniture.

Fine plants (3 or 4 per pot) from	Fr.	1.50	to	7.—
Stronger specimen (6 to 8 per pot) from	„	10.—	„	25.—
<i>Areca nobilis</i>	„	4.—	„	22.—
„ <i>rubra</i>	„	2.—	„	5.—

Areca sapida is a robust short growing variety very recommandable for culture in apartments as it does not suffer of the changements of temperature.

Fine market plants from	Fr.	1.—	to	3.—
Stronger plants from	„	5.—	„	12.—
<i>Areca Micholitzii</i>	„	20.—	„	45.—
„ <i>Verschaffeltii</i>	„	1.25	„	20.—
<i>Arenga saccharifera</i>	„	3.—	„	18.—
<i>Astrocaryum mexicanum</i>	„	4.—	„	30.—
<i>Brahea filifera</i>	„	5.—	„	20.—
„ <i>Roezli</i>	„	8.—	„	25.—
<i>Calamus Lewisianus</i>	„	6.—	„	15.—
<i>Caryota plumosa</i>	„	2.50	„	10.—
„ <i>sobolifera</i>	„	2.75	„	20.—
„ <i>urens</i>	„	1.—	„	15.—
<i>Carludovica palmata</i>	„	4.—	„	18.—
<i>Ceroxylon niveum</i>	„	4.—	„	20.—
<i>Chamædorea corallina</i>	„	2.—	„	10.—
„ <i>elegans</i>	„	3.50	„	16.—
„ <i>Ernesti-Augusti</i>	„	5.—	„	20.—
<i>Chamærops elegans</i>	„	5.—	„	28.—

Chamærops excelsa.

***Chamærops excelsa* (Fortunei)** may be recommended as a very good apartment Palm as well as a good plant for decoration. It is very resistible against transport and cold weather and therefore is much used for outdoor decoration in summer.

Fine market plants from	Fr.	1.—	to	4.—
Strong plants in pots or in tubs from	"	6.—	"	25.—
<i>Chamærops gracilis</i>	"	4.—	"	20.—

Chamærops humilis is also a very robust variety that grows a little slowly and shapes bushes. The stem and ribs of the leaves are white.

Fine market plants from	Fr.	1.—	to	3.75
Stronger plants from	"	5.—	"	15.—

Cocos weddelliana.

<i>Cocos australis</i> from	Fr.	3.—	to	30.—
" <i>Blumenavi</i> from	"	8.—	"	35.—
" <i>Bonnetti</i> from	"	6.—	"	40.—
" <i>flexuosa</i> from	"	1.—	"	10.—
" <i>insignis</i> from	"	4.—	"	30.—
" <i>plumosa</i> from	"	6.—	"	32.—
" <i>Romanzoffiana</i> from	"	1 50	"	12.—

Cocos weddelliana is the lightest variety that we have in the trade and for all fine garniture the most used.

Nice young plants, very healthy and darkgreen	Fr.	0.75	to	1.25
Middle-size " " " " " "	"	1.50	"	5.50
Strong specimen " " " " " "	"	7.—	"	18.—

Corypha australis.

Corypha australis is a nice and robust variety that may be offered as a very good apartment-Palm.

Fine market plants from	Fr.	1.—	to	3.50
Strong specimen from	"	6 —	"	18.—
<i>Dæmonorops fissus</i>	"	5.—	"	18.—
" <i>microcarpus</i>	"	3.50	"	15.—
<i>Elaeis Guineensis</i>	"	3.—	"	30.—
<i>Euterpe edulis</i>	"	4.—	"	12.—
<i>Geonoma gracilis</i>	"	1.—	"	6.—
" <i>Schottiana</i>	"	1.50	"	7.50
" <i>speciosa</i>	"	1.—	"	5.—
<i>Glaziova elegantissima</i> (s. <i>Cocos weddelliana</i>).				
<i>Glaziova insignis</i> (s. <i>Cocos insignis</i>).				
<i>Hyophorbe</i> (s. <i>Areca</i>).				

Kentia belmoreana

Kentia belmoreana is a very graceful variety that obtains actually the greatest sale in all countries; it will be always preferred by the public as it joins to its fine appearance all the best qualities.

Nice young market plants from. .	Fr.	1.—	to	2.50
Fine middle-size plants	"	3.—	"	8.—
Very strong specimen	"	10.—	"	30.—

Kentia forsteriana is not less recommandable as the preceding variety. Although the general appearance of the plant is not as light, it is sometimes preferred to *Kentia belmoreana* because a less warm temperature is sufficient and the foliage is bright and dark green.

Kentia forsteriana

Nice young market plants	from	Fr.	1.—	to	2.—
Fine, middle size plants	"	"	2.50	"	4.—
Stronger plants for garnitures	"	"	5.00	"	8.—
Very strong specimen	"	"	10.—	"	28.—

Kentia grown in tuft.

Kentia in tufts :

(3 or 4 plants together in one pot). The Kentia belmoreana and specially the Kentia forsteriana are actually much grown in tufts, and the demand increases every year.

These plants in tufts offer a great advantage : they are always very well furnished and saleable and they may lose some leaves without diminishing in value.

Nice young tufts from	Fr.	1.50	to	3.—
Stronger " "	"	4.—	"	14.—
Very strong " "	"	16.—	"	35.—

Kentia rupicola has the same good qualities as *Kentia forsteriana*; the stem and ribs of the leaves are red coloured.

Fine plants from	Fr.	2.—	to	8.—
Kentia Canterburyana	"	1.50	"	15.—
" Mac-Arthuri	"	3.50	"	25.—
" Mooreana	"	2.50	"	12.—
" Wendlandi	"	3.50	"	32.—
Latania aurea	"	10.—	"	35.—

Latania borbonica.

Latania borbonica is generally considered as the best of the palmated varieties. Its bright foliage is very decoratif and characterizes early.

Nice, young market plants from	Fr.	1.—	to	2.—
Middle-size " "	"	3.—	"	8.—
Strong specimen-plants " "	"	10.—	"	20.—
Latania rubra	Fr.	3.50	"	18.—
Licuala grandis	"	8.—	"	50.—
Livistonia Hoogendorpi	"	5.—	"	30.—
" rotundifolia	"	2.50	"	12.—
Phœnicophorium Seychellarum	"	8.—	"	55.—

Phoenix canariensis

Phoenix canariensis is a very hard and recommandable palm. I offer this variety in plants of own culture and in imported plants from Italy.

Nice young plants (from own culture)

	Fr. 1.— to 3.—
" " " (imported fr. Italy)	" 2.— " 2.50
Stronger market plants " " "	" 3.— " 6.—
Very strong specimen " " "	" 8.— " 18.—
Phoenix leonensis	" 1.— " 8.—

Phoenix reclinata.

Phoenix reclinata is a nice variety much used for culture in apartments.

Nice plants, well furnished from	Fr. 1.— to 3.50
Strong plants, well furnished from	" 5.— " 15.—
Phoenix rupicola	" 2.— " 12.—

Phoenix Rœbelini is a nice and very light hot-house variety that was not yet well known till now, because the seeds were rare and difficult to obtain. Last year larger importations have been sent, and they allowed me to make an abordable price for young plants.

Nice young plants with 2 till 5 characterized leaves, from	Fr. 2 — to 4 —
Strong plants	" 25.— " 80.—
Phoenix senegalensis	" 3.— " 15.—
" tenuis.	" 0.80 " 18.—
Pritchardia filifera	" 5.— " 25.—
Ptychoraphis Augusta.	" 12.— " 28.—
Ptychosperma Alexandræ	" 4.— " 12.—
Rhapis flabelliformis	" 4.— " 35.—
" humilis	" 6.— " 40.—
Seaforthia elegans	" 1.— " 8.—
Thrinax argentea	" 4.— " 25.—
Washingtonia robusta.	" 2.50 " 12.—

Young Palms for decorng uses.

I deliver young palms in several good varieties for decorng and filling, from Francs : 50 to 70 p. 100.

Dracaena.

Greenhouse varieties.

Dracaena australis aurea striata	Fr. 4.— to 25.—
Beautiful variety with large gold striped leaves.	
Dracaena australis (green)	" 1.— " 20.—

Dracaena Boelensi (or Parei).

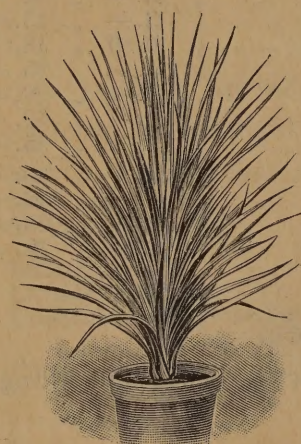

This new **Dracaena** that I offered in the trade two years ago, is one of the best hybrids of the *Dracaena lineata*, that it surpasses in all points; it is as robust as *Dracaena indivisa*, the leaves are very broad and their ribs are cherry-red coloured.

Nice plants in pots from	Fr. 1.50 to 8.—
Strong specimen in tubs from	" 10.— " 30.—

Dracaena Bruanti is one of the most used commercial varieties; the upper leaves are bronze-red coloured. It is very recommendable for the retail trade as it is good durable plant for the market and shops.

Nice well furnished plants at Frs. 75, 100, 125 and 150 p. 100

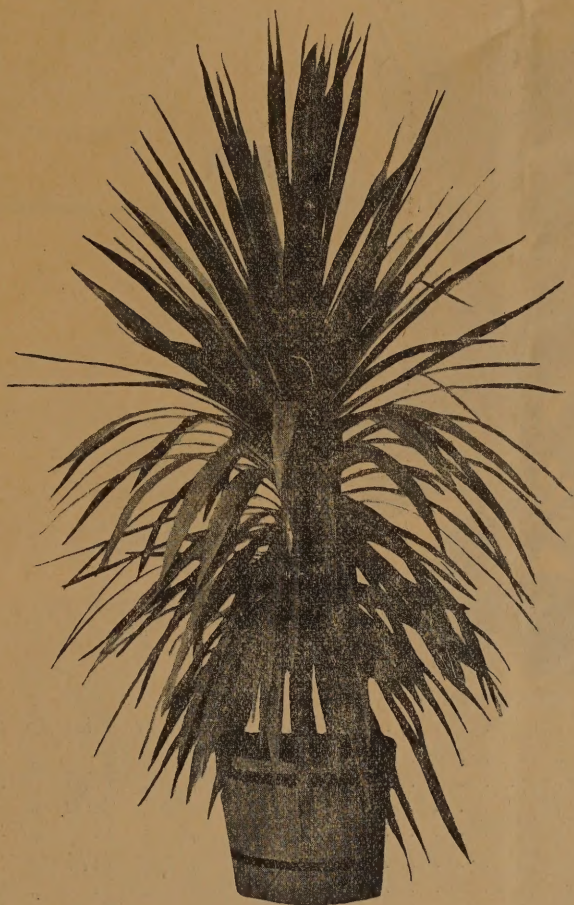

Dracaena cannaefolia	Fr. 1.50 — 5.—
Dracaena congesta	" 50 — 80 p. 100
Dracaena congesta discolor	" 50 — 80 " 100
A very good sort for garniture and filling.	
Dracaena Dhaenelli	" 1.— — 3.50
Dracaena Doucetti	" 7.50 — 20.—
Dracaena gracilis	" 50 — 80 p. 100

Dracaena indivisa

Dracaena indivisa will be always a good commercial variety. I dispose during all the year of a large stock of fine, healthy, well furnished plants at very reduced prices.

Nice market plants in pots from	Fr. 80 to 150 p. 100
Strong plants in pots from	" 2.— to 3.50 each.
Very strong plants in tubs from	" 8.— " 24.— a pair.

Dracaena lineata.

Dracaena lineata. The

demand for this useful variety has against increased in the last years, and the extension I have given to its culture allows me to offer it at the lowest possible prices. — I only grow the true broad leaved sort and all my plants are grown from stems and roots.

Nice market plants
from. . Fr. 1.— to 2.50 p. 100
Strong plants in pots
from. . Fr. 3.— to 5.— each.

I make a large speciality of strong **Dracaena lineata** in tubs, much used for all kinds of decoration and garniture.

Very strong plants in tubs Fr. 12.— to 40.— a pair
Dracaena rubra " 0.80 to 1.50.

Hothouse Dracaenas.

<i>Dracaena Alberti</i>	from Fr. 1.50	to 4.—
" <i>Amabilis</i>	" " 1.—	" 2 50
<i>Dracaena Baptisti</i>	" " 1.75	" 3 50
" <i>Baronne de Rothschild</i>	" " 2.—	" 4 50
" <i>Bausei</i>	" " 2.—	" 4.—
<i>Dracaena Cantrelli</i>	" " 1.75	" 3.50
" <i>Comte de Kerckhove</i>	" " 3.—	" 5.—
" <i>Gladstonei</i>	" " 2.—	" 4.—

Cyrtomium falcatum

Cyrtomium falcatum is a nice very recommandable cold-house fern, that is generally unsufficiently known in the trade. As small plant it is a very good filling variety and when stronger it makes a deserving and durable plant for apartments. It grows quickly and produces long leaves, that are much used by the florists. Under shade it can be grown in the full air in summer, and wants little care in winter.

I deliver young well furnished plants from Fr. 20 to 40 p. 100

Strong market plants from " 60 " 90 "

Vibirnum tinum voir Laurus tinus .				

Azalea Mollis.

My **Azalea mollis** are grown from the finest hybrids and give an admirable variation between the darkest scarlet and orange and the brightest canari-yellow.

To this culture, that is generally considered as a very easy, I apply a special attention and my principal endeavour is to become short, well shaped bushes, with strong sticks and covered with thick, well filled buds.

From the end of August and during all the winter untill the following spring I have a large stock to sell at the moderate prices :

Well shaped stuff, with 12 to 15 buds	at	Fr. 30.—	p. 100
" " " " 15 " 20 "	"	" 40 —	" "
" " " " 20 " 25 "	"	" 50 —	" "
" " " " 25 " 35 "	"	" 60.—	" "
Very strong plants	from	" 0.75	à 1.50 each

Ficus elastica.

Ficus elastica.

The **Ficus elastica** is a good, well known market plant, with large bronze-brown leaves.

Nice plants, quite healthy from Fr. 0.75 to 1.25.

Cuttings : Every year, in the months March and April, I have very large quantities of well rooted cuttings, at the price from 35 to 55 p. 100.

Clivia miniata (Bimantophyllum).

Clivia miniata.

My **Clivias** are all cultivated from the newest most deserving hybrids, with broad, darkgreen leaves, short growing and producing large bright flower bouquets.

Strong plants, fit for flowering or budded	from Fr.	1.—	and	1.50
Smaller plants to flower next year	" "	70.—	"	85.— p. 100
Young plants of one and two years	" "	35.—	"	60.— " "

Phormium.

The **Phormiums** belong to the most usefull plants for decoration; they are robust and of easy culture and they are much used for all kinds of garniture in the full air.

Phormium Colensoi fol. var. in pots	from Fr.	1.50	to	5.—

Laurus Nobilis

(Sweet Bays)

The culture of *Laurus nobilis* belongs to my greatest specialities. The special situation of my gardens allows me to obtain on my trees an uncommon growth and to deliver them at very moderate prices.

I dispose during all the year of large quantities of standards and pyramids in all sizes. I specially recommend me to the wholesale nurserymen who can take large sendings with reduction.

Standard=trees

Height of the stem : 2 $\frac{3}{4}$ to 4 feet.

Roses best commercial sorts	" 1.50— " 250.— p. 100
Spirea japonica	" 20.— " 35.— "
Viburnum opulis	" 75.— " 125.— "

Begonia & Glorinia.

The principal places for the cultures of flower-bulbs are in Holland, but many outlandish nurserymen and seedsmen don't know that Ghent has the greatest speciality of the Begonias and the Gloxinias, and they buy their stuff from second hand at very high prices.

Tuberous Begonia.

My Begonias belong to the best, large flowering sorts and are disposable in five separate colours : red, pink, orange, white and yellow.

Tuberous Begonias

Single, Begonias in separate colours

at	Fr. 7.— and 8.— p.100
" " all colours mixed	" 6.— "

Double Begonias in separate colours

at	Fr. 10.— 12.— and 15.— "
" " all colours mixed at	" 9.— "

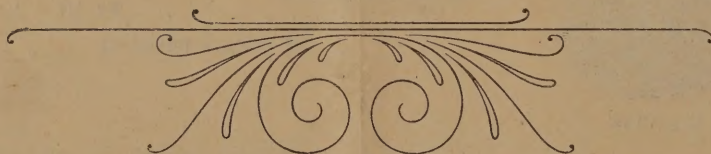

Gloxinia.

Gloxinia Violacea.
